

# Bee I Play Floor

## Operating the Bee I Play Floor System:

The Bee I Play Floor Tiles are made out of a polycarbonate shell that will withstand 3000lb of pressure per tile all protected by a vinyl membrane. The wall mount console is constructed of steel and powder coated for protection. The Bee I Play Floor Move Software gives you full control over your content. You decide which games are active, where each game is located, even the game's length. With this password protected Administration Area, operators can control almost every aspect of their system. The Administration Area also holds a full Diagnostic Suite and displays key reports showing you how much your content is being played. Maintenance is just as easy. At the end of the day, just clean the surface with a damp cloth or mop and bucket. If your vinyl covering becomes dirty or damaged, all that is needed to replace is the vinyl. The Bee I Play Floor Move System also ships with a spare tile. If for some reason you are having issues with a tile, simply disconnect it, pull it right up and drop in the spare. Everything is back up and running in less than five minutes.

## System Highlights:

- Audio prompts and game instructions make playing every activity easy
- Visually stunning and appealing. The Bee I Play Floor emits vivid LED colors when being used

## Develops Fitness Skills

Bee I Play Floor will develop the same skills that regular fitness programs develop: endurance, coordination, agility, and flexibility, as well as strategic thinking and memory. Kids would need to participate in several sports to get the same benefits. Bee I Play Floor has 7 games for the play floor, Dodgeball, Bug Invasion, Musical Squares, Tennis Pro, Memory Buster, Zero Gravity, and Knock Down. As kids move from one game to the other, they improve different skills without breaking their rhythm or losing their enthusiasm.
