

# Bee I Play Wall

## Operating the Bee I Play Floor System:

The Bee I Play Wall Move Software gives you full control over your content. You decide which games are active, where each game is located, even the game's length. With this password protected Administration Area, operators can control almost every aspect of their system. The Administration Area also holds a full Diagnostic Suite and displays key reports showing you how much your content is being played. Maintenance is just as easy. At the end of the day, just clean the surface with a damp cloth. If your vinyl covering becomes dirty or damaged, all that is needed to replace is the vinyl. The Bee I Play Wall Move System also ships with a spare tile. If for some reason you are having issues with a tile, simply disconnect it, pull it right up and drop in the spare. Everything is back up and running in less than five minutes. This is an Exergaming experience like no other. Bee I Play Wall puts physical activity into a game context. Activity becomes entertaining. Kids can run, jump, move, and throw balls in an environment of fun, not one of pressure to perform. Cooperative games require players to work together to beat competing players, adding a dimension of cooperative play to the games. And because the games are responsive to the users, users are able to perfect their skills at their own pace. The games gradually become more difficult as the players become more proficient.

## System Highlights:

- Simple (UI) user interface which allows kids to choose Games, Activities & Lightshows"
- Operate fun and engaging relay races and huge multi-player activities within your facility
- Audio prompts and game instructions make playing every activity easy

- User statistical data is saved on the system such as game time, high scores etc
- On-board diagnostic system making service easy. Updates come in the form of Disc or USB input
- Develops fitness skills, social interaction & combines physical activity with engaging technology

## Develops Fitness Skills

It will develop the same skills that regular fitness programs develop: endurance, coordination, agility, and flexibility, as well as strategic thinking and memory. Kids would need to participate in several sports to get the same benefits. Bee I Play Wall has 7 games for the play floor, Dodgeball, Bug Invasion, Musical Squares, Tennis Pro, Memory Buster, Zero Gravity, and Knock Down. As kids move from one game to the other, they improve different skills without breaking their rhythm or losing their enthusiasm.
