

# Bee I Sports Arena

## Operating the Bee I Sports Arena System:

The new Bee I Sports Arena II delivers a physically active and mind-engaging fitness experience, along with ground-breaking individual player results tracking (great for justifying PEP grants!), updateable sound themes (musical tones, animal sounds, sci-fi tones and more!) and multiple games for YMCAs, Schools, Park Districts, Health Clubs and the ever growing Medical Market. This multiplanar, multidirectional interactive fitness game delivers documented brain and body fitness while providing the participant unbridled fun and excitement!

The concept of the Bee I Sports Arena II is so simple, even toddlers can play! Listen for the tone (to identify which tower), move to the tower, identify the light, and tap it as quickly as possible. The player is scored on accuracy as well as reaction time. Sounds easy, right? Yet Bee I Sports challenges top professional athletes and US military Special Forces! With its variable speeds and customizable light pattern configurations, we can create the ultimate Exergaming experience for any level of single participant or teams. Bee I Sports is enjoyed by everyone!

## System Highlights:

- Full color touch screen
- Customizable tones
